Q- Horse and Camel Puzzle

A horse and a camel were carrying boxes on their backs. The horse started complaining to the camel that his load is too heavy. The camel replied 'Why are you complaining? If you gave me one of your boxes I would have double what you have and if I give you one of my boxes we two would have an even load.' How many boxes do each of the animal (horse & camel) is carrying ?

My Approach and Solution –

Horse is carrying 5 boxes

Camel is carrying 7 boxes
