# Puzzle – 32

Q- Placing the numbers Puzzle

Place the numbers 1, 2, 3, 4, 5, 6, 7, 8 into the eight circles in this figure, in such a way that no number is adjacent to a number that is next to it in the sequence. For example 1 should not be adjacent to 2 but can be adjacent to 3, 4, 5, 6, 7, 8. Similarly for others.

My Approach and Solution –
